PROFILE

Computer Science graduate with expertise in software engineering and deep learning. Experienced in developing and optimizing image classification models using CNNs (ResNet50) with TensorFlow and Keras. Skilled in Python, data preprocessing, and model deployment. Proficient in debugging, performance optimization, and building scalable software solutions.

EDUCATION

Diponegoro University - Semarang

Aug 2019 – Dec 2024

Bachelor's Degree in Informatics, GPA: 3.32/4.00

Thesis Title: Classification of Fruit Freshness Using a CNN-Based ResNet50 Model.

WORK EXPERIENCE

Mattstock - Bogor

Jul 2021 – Jul 2022

Lead Back-End Developer (Freelance)

- Developed and maintained the e-commerce backend for product and order management.
- Optimized API performance for inventory management by implementing caching and efficient database queries, reducing response time and improving stock accuracy.
- Completed a 6-month startup training program under Kampus Merdeka, gaining hands-on experience in technology strategy, product development, and team management from a CTO perspective.

Rumah Sakit Nasional Diponegoro - Semarang

Dec 2021 – Feb 2022

IT Support & Back-End Developer (Internship)

- Troubleshoot and resolved software and hardware issues for employees.
- Enhanced key features and fixed critical bugs in RSND software, improving system efficiency.
- Developed an authentication system for the RSND mobile application using OTP via WhatsApp (Node.js), reducing dependency on third-party OTP services.

PT. Talian Infodinamika – Remote

Oct 2021 – Jan 2022

Programmer & IT Consultant (Internship)

- Worked with ERP, Git, Figma, and Android Studio.
- Developed and integrated additional features for the employee mobile application, including a calendar and Google Maps functionality.
- Completed coding tasks assigned by mentors, contributing to app stability and usability.

ARSocial Corporation – Remote

Jul 2013 – Dec 2013

Full-Stack Developer & Sales Manager (Freelance)

- Designed, developed, and maintained the company's website, ensuring frontend-backend stability.
- Identified and reported an API vulnerability that allowed in-game purchase manipulation.
- Managed resellers and customer relationships, driving 100+ sales of in-game currency.

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Informatika - Semarang

Apr 2020 – Dec 2021

Staff, Education and Training Division

- Improved the quality of education for Informatics students by providing academic resources.
- Compiled and organized exam materials, contributing to better student performance.
- Assisted in research and educational initiatives to enhance learning opportunities.

Annual Informatics Competition - Semarang

Jun 2020 – Nov 2020

Vice Leader

- Led weekly meetings to plan, coordinate, and evaluate event preparations.
- Engaged team members to ensure smooth event execution.
- Managed exam materials for participants, contributing to a well-structured competition.

Path of Informatics Research - Semarang

Aug 2020 – Oct 2020

Member, Public Relations Division

- Negotiated with speakers and secured their participation in events.
- Acted as a liaison between the organizing committee and speakers, ensuring smooth communication.
- Coordinated the delivery of speaker fees and plaques on time.

SKILLS

Programming Languages: Python, JavaScript, PHP, Java, C/C++, Golang

Web & Mobile Development: React, React Native, Node.js, API Development

Tools & Platforms: Git, Docker, Firebase, MySQL, PostgreSQL

Deep Learning: TensorFlow, Keras, OpenCV, Matplotlib, Pandas

Soft Skills: Communication, Team Work, Leadership
